

## Care & Maintenance Recommendations For Las Vegas Rock Meta-Quartzite Stone Products

Thank you for choosing LVR meta-quartzite stone for your project. The following instructions and information is for you to examine for the future care & maintenance of the stone products that were installed on your project. Properly sealing any stone is the most important step to preserving the look and integrity of the stone.

### Routine Care:

The Las Vegas Rock Meta-Quartzite Honed or Polished finishes can be cleaned with any non-oil based stone or all-purpose household cleaner. When applied with other materials such as grout, sealer, or caulking please follow the manufacturer's recommendations for maintenance and care. Routine preventative cleaning will actually reduce the need for any problem solving maintenance & care in the future. However, we would recommend using Aqua Mix (Custom Building Products) Concentrated Stone & Tile cleaner for routine maintenance. Use Aqua Mix heavy duty Tile & Grout cleaner for periodic heavy duty cleaning. Mix cleaning solution making sure not to mix stronger than the recommended ratio.

The Las Vegas Rock Meta-Quartzite Windswept surfaces and or Split Face surfaces can be cleaned with a small pressure washer to remove any dust accumulation that may occur.

Held in conjunction with the Marble Institute of America
